MyQ Ricoh SmartSDK Embedded Terminal 7.5

7.5.3 RTM

Bug Fixes

- Terminal has been restarted during searching in codebooks.
- Free operations have been disabled when credit was low.
- Parameters for Easy scan or Easy copy have been displayed even when all parameters were prohibited to change by the user.
- It wasn't possible to mark job as favorite if user has credit = 0.
- Long job name or long username have not been correctly trimmed in My jobs.

7.5.2

Bug Fixes

- Job name wasn't displayed in My jobs when job was disabled by the Job filters.
- Fixed issue that terminal stops being displayed.
- Fixed using Easy Fax with Codebooks.

7.5.1 RC

Bug Fixes

- Legacy application were disabled, when device lost connection to the MyQ server.

7.5.0 RC

Improvements

- Possibility to synchronize users from MyQ server to print device and allow offline login to the users who never used the device in online mode.
- **NEW FEATURE** New Easy Copy parameters are supported: advanced duplex, original orientation and density.
- **NEW FEATURE** New Easy scan parameters are supported: original image, original orientation, density, mixed size and skip blank pages.
- **NEW FEATURE** Stapling and punching options are possible to use in Job options in MyQ jobs. For correct behavior of this function, hardware option for stapling and punching is required.
- **NEW FEATURE** Black themes of Embedded terminal are supported.

Bug Fixes

- Easy scan parameters wasn't possible to use when Project selection was enabled.
 - Embedded terminal isn't crashing when Scanning to fax server is used.
 - Simplex/duplex parameter was assigned to *unknown during offline login.
 - User was not informed about exceeding quota.
-
